*Sustainable Services*

The path to a successful project can be perilous...

- Location
- Layout
- Earthwork
- Storm Water
- Utilities
- Wetlands
- Permits
- Bidding
- Construction

...we can make the process smoother

**EVERGREEN  
CIVIL ENGINEERING LLC**

## Welcome to Evergreen Civil Engineering LLC...

...where sustainability is a part of who we are, right down to our name. Bill Meyer started Evergreen Civil after 28 years in civil engineering to serve in a new way.

With Evergreen Civil, your projects are all completed:

- By a senior civil engineer experienced in municipal and site engineering
- With a commitment to sustainable solutions
- Using current, efficient civil engineering hardware & software
- With the efficiency and responsiveness that an owner-engineer firm can provide
- With an open mind to new ideas and approaches

Evergreen Civil Engineering LLC reduces overhead time and expense without compromising the services you need. You and your projects benefit as Evergreen Civil applies 28 years of creative engineering experience, working closely, efficiently, and flexibly with you to achieve your goals.

## Municipalities

Evergreen Civil understands your need to provide maximum value to your residents, with minimal interruption to their vital services and respect for their concerns. We understand that you are often expected to do more with less. We will apply our municipal engineering experience to provide the efficient support you expect.

## Architects & Landscape Architects

Your clients look to you to balance beauty, performance, and cost. Evergreen Civil values your lead role in achieving this delicate balance. We will become a supportive member of your team, with the success of your designs as our goal. With our site design experience and efficient operation, we will provide the technical expertise you expect within your budget.

## Developers

We have great respect for your risks and responsibilities when you bring a new development or redevelopment into existence. Evergreen Civil will save you time and expense with our streamlined operation and site development experience. We work with you to achieve the project you envision and the efficiency you expect.

### *Subdivisions*

### *Storm Water Management*

### *Erosion Control & Sediment Loss*

### *Flood Plain Studies*

### *Public Utility Extensions*

### *Agency Coordination & Permits*

### *Bidding & Construction Engineering*

## Sustainability

To Evergreen Civil, sustainability means that we look into the future to assess the impacts of what we do today. We use the best information we have in the present to consider:

- Operation and maintenance
- Health and safety
- Water quality
- Air quality
- Local and distant environments
- Natural habitats
- Social relationships

Every choice and every action consumes something. With sustainable solutions, the goal is to consume only that which can be replaced quickly enough to not permanently deplete the resource. We reduce the burden on the future by wisely using resources in the present.

Evergreen Civil is committed to providing sustainable solutions on your projects. We look beyond the short term and consider the long-term costs of owning and operating your project after it is completed. These long term considerations can affect not only your costs, but also the long-term health and safety of our society. We believe it is in the best interest of our clients and of society that we do so.
