Modified Whey Protein (Milk), Microcrystalline Cellulose, Stearic Acid, Hydroxypropylcellulose, Calcium Palmitate, Pharmaceutical Glaze.

Our company produces supplements you can count on for superior quality. With scientifically backed ingredients, unique formulation, and superior packaging, we always strive to make products that make a difference for our customers. Professional Strength Flexatine® is manufactured in our cGMP, NSF certified and FDA inspected facility.

Protect your joints from aging and environmental factors which slow you down. Professional Strength Flexatine® is formulated with key nutrients specific to proper joint function. It goes beyond the support other joint supplements provide with a threefold approach. Flexatine® supplies bioactive, high sulfur precursors which promote joint resilience, boosts antioxidant defenses and glutathione production, and supports healthy cysteine levels involved in the body's anti-inflammatory response. Flexatine features NutraJIT™, an exclusive targeted release delivery system. It uniquely protects nutrients through the stomach and releases them slowly in the small intestine for longer lasting effects and maximum bioavailability.

Reduction in total WOMAC scores *p<0.05, **p<0.02, ***p<0.002

	T2	T3
Cynatine FLX (500mg/day)	28.9%	37.50%
BioCell Collagen (2g/day)	20.9%	33.95%

Percent decrease in total WOMAC scores at T2 and T3

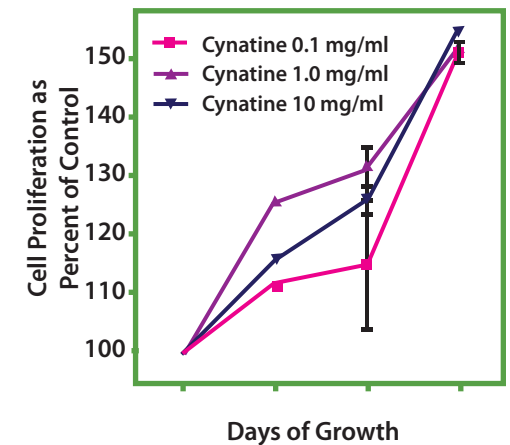

Subjects given Cynatine® FLX, an active ingredient in Flexatine®, reported a significant reduction (p<0.05) in mean total pain, total stiffness and total physical function WOMAC scores after only 6 days of treatment.

Is Flexatine® for you?

240 Joints in the body

- Fast Acting
- Protected Delivery For Maximum Absorption
- Shellfish Free
- Comprehensive 14 Ingredient Formula
- Drug-Free Natural Alternative

Joints need sulfur in order to prevent deterioration and maintain proper function. During metabolism, the body utilizes the amino acid cysteine to release sulfur and enable it to be used by joints. Cynatine® FLX, an active ingredient in Flexatine®, is a rich source of both sulfur and cysteine. It provides these nutrients in a bioavailable form for maximum absorption, and has been shown to increase cell proliferation in a short period of time.

Flexatine® is a registered trademark of Dietary Pros, Inc. Cynatine® FLX is a registered trademark of Roxlor, LLC. NutraJIT™ is a trademark of Biovelia.
