

A Note from Company President, Kurt Wendt

Thank you for considering Merrill Sheet Metal Works Inc. for your project. Your loyal support has enabled us to provide Merrill and the surrounding area with cooling and heating services for the past 99 years.

After all these years we are still family owned and operated. As a third generation owner, I am proud to continue the tradition passed down from my grandfather and father. We consider our employees and customers to also be a part of our family. The welcome mat is always rolled out and the coffee is always hot.

Our #1 priority is taking responsibility for our customers' safety and comfort. We will never cut corners or install products that we do not or would not trust in our own homes.

Our promise to you is to listen first - as our customers opinion matters most. As it says on our sign, we believe that "there is comfort in loyalty," and we are proud to serve our community!

Thank you,
Kurt Wendt
President, Merrill Sheet Metal Works, Inc.

Peak Performance Program

Your heating and cooling system is vital to the comfort and safety of your family and your customers, yet it is often taken for granted. Much like an automobile, your heating and cooling system needs regular maintenance to provide you with maximum comfort, efficiency, and reliability. Our Peak Performance Program offers you the following services for an affordable annual fee.

Spring Check Up*

- *Air Conditioner / Heat Pump* check up, which includes: filters, outdoor coils (and indoor if accessible), pressures and temperatures, voltage and amp draw, thermostat, blower assembly, condensate drain, start contactor, and cycle equipment
- *Water Heater* check up, which includes: cleaning of pilot, draining and refilling if necessary, replacing thermocouple, checking for safe vent operation

Fall Check Up*

- *Water Heater* check up, which includes: (see above)
- *Furnace* (gas or oil) check up, which includes: filters, heat exchanger, gas pressure, fan, thermostat, blower, burners, ignition system, venting, flue, temperature rise, wiring, combustion chamber, oil lines, oil pump, lubrication, motor, and leak check

OR

- *Boiler* check up, which includes: steam pressure, water temperature, water level, valves, nozzle, ignition device, motor, gauges, wiring, safety devices and controls

*descriptions above are shortened, full descriptions available upon request.

Other units which may be covered under a Peak Performance Plan include (but are not limited to): Fireplaces, Gas/Wood Stoves, Electric Heaters and Exhaust Fans.

Merrill Sheet Metal Works, Inc. has been meeting the heating and cooling needs of our customers in Merrill, Wausau and the Central Wisconsin area for 99 years. As a Factory Authorized Bryant Dealer, MSMW, Inc. is your local expert in heating, cooling, building performance and safety.

This program is available for both our residential and commercial clients.

Four reasons to sign up for the Peak Performance Program through Merrill Sheet Metal Works, Inc.

- **Reduced Monthly Energy Costs**
A properly maintained heating and cooling system can operate **10% more efficiently** than a dirty and neglected system
- **Savings on Repairs**
The program includes a **10% discount on all parts and labor charges** during normal work hours for any additional service/repair needs that arise. Emergency (after hour) calls will be discounted by 5%.
- **Convenience**
You don't have to remember when maintenance is due—**we will remind you** when it's time for your Spring and Fall check ups and will work with you to schedule them at your convenience.
- **Extended Equipment Life**
Regular maintenance can catch and correct minor problems before they can grow into costly emergencies. Well maintained systems have longer lives.
