

probiu**m**® LLC

probiu**m**-THE PREMIUM PROBIOTIC COMPANY™

What's In *Your Gut?*™

Probiotics for the Entire Family

Product Guide

The Science Behind What We Do

With many years of experience in the probiotic industry, our team has developed an in-depth understanding of probiotic cultures and the parameters that influence product quality. The result is probiotic products that feature only the highest quality ingredients to benefit and enhance digestive health*.

Other Ingredients on the Label

Reading labels is an important part of determining the level of quality in any given consumable product on the market. Labels are also an important source for identifying unwanted or “no-value” added fillers. To maintain premium quality standards, all Probium® products are Non-GMO, Non-Dairy and free of:

- Gluten
- Maltodextrin
- Magnesium Stearate
- Soy
- Wheat
- Eggs
- Yeast
- Sugar
- Salt
- Animal Derivatives
- Artificial Flavors

Product Innovations

Active Packaging Technology

Probiotics are sensitive to moisture and oxygen. Our moisture controlling bottle and oxygen removal system delivers additional product stability to our packaged probiotics. The uniquely engineered Activ-Polymer™ bottle features an impenetrable desiccant sleeve - surrounding the probiotics so they stay virtually moisture free. To further extend shelf life, every Probiom® bottle contains an Oxyfree® desiccant. With this single oxygen destroying packet, residual oxygen inside the bottle is absorbed, bringing oxygen levels in the bottle to 0.01% during the intended shelf life.

Delayed Release Veggie Capsules

Probiotics need time to work. The innovative benefit of the delayed release capsule helps protect probiotics from stomach acid, safely delivering them to the intestines for maximum product benefit, and significantly reduces the opportunity for nutritional degradation compared with standard immediate release capsules. Key study results displayed the disintegration of the delayed release capsule starting approximately 45 minutes later than a typical immediate release capsule of about 5 minutes. All Probiom® capsulated products are produced with a delayed release veggie capsule.

Double Benefit of Prebiotics

Our unique prebiotic combination of Sunfiber® & FOS enhances probiotic efficacy. Prebiotics are non-digestible carbohydrates that act as food for probiotics. Probiotics are manufactured in a freeze dried state. In other words the cells are sleeping. And despite all the efforts used to keep them in this dormant state, even the slightest exposure to light, heat, moisture or air can cause some of these cells to wake. When they wake up they're hungry and need food, and without a food source they will die. This is why prebiotics need to be present to provide food so the live cultures can stay alive. It's extra insurance that every good probiotic supplement should have available.

Acid and Bile Resistant Strains

All Probiom® probiotic strains are sourced through DuPont™ Danisco® - trusted by many of the world's leading manufacturers of dietary supplements and nutritionals. These probiotic cultures have proven stability and are internationally recognized as safe for consumption. The unique and patented stabilization technology has been applied across the probiotic range, allowing Probiom® to offer the most stable overall probiotics in the industry and help meet the ultimate goal of delivering the intended health benefit to the consumer.

Branded Products

Dual Blend 6B

6 Billion CFU
per Serving (1 Capsule)

60 Servings of Delayed
Release Veggie Capsules

- Exceeds 6 Billion CFU per Serving of a Proprietary Blend of Lactobacillus acidophilus La-14 and Bifidobacterium longum BI-05
- Other Ingredients - Sunfiber® (Partially Hydrolyzed Guar Gum), Fructooligosaccharides (FOS), Vegetable Powder, Silicon Dioxide & Vegetable Cellulose (Delayed Release Capsules).

Private Label

Interested in private labeling a ready-to-fill probiotic formula or your own custom proprietary blend? Our private labeling capabilities and resources will provide the solution.

Why Probiom as your Private Label store brand?

Here is what is trending. Based on research from the Private Label Manufacturers Association, the statistics show having a private label for your store will **increase revenue and store loyalty by 87%**.

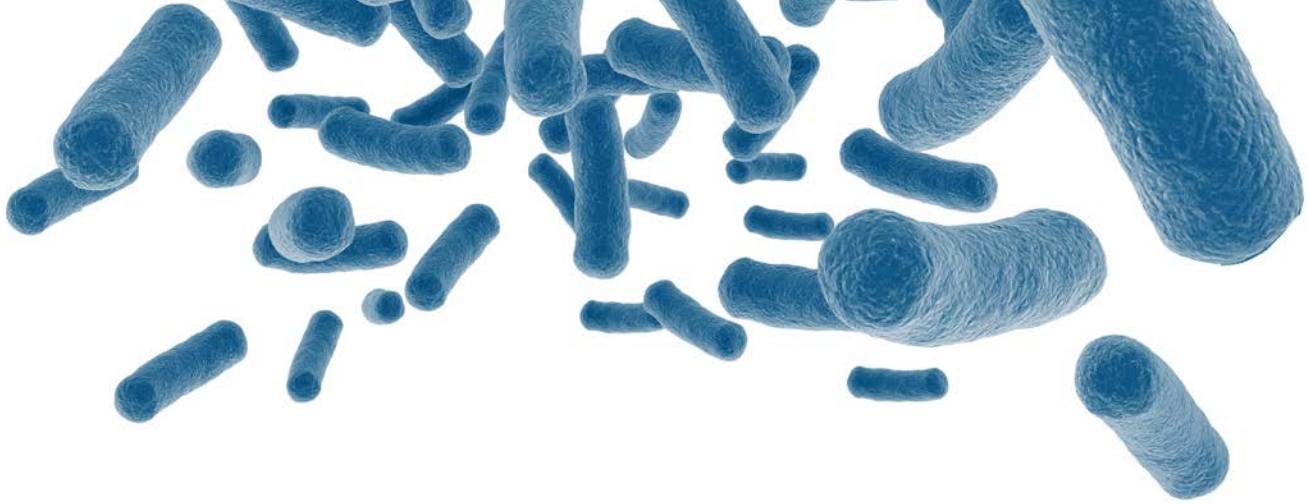

- Shoppers who identify themselves as frequent buyers of store brands are at an all-time high at 57%.
- When introducing a store branded product, over 83% of shoppers will choose the store brand over national branded products.
- When shopping for a particular national brand, 60.8% of consumers indicate they purchase the store brand instead when the national brand is not available.

Our Story

Probiom - The Premium Probiotic Company offers a broad range of premium probiotic products and expertise based on 25+ years combined experience in the industry. Our company serves a diverse client base both domestically and worldwide and strives in building partnerships with all our customers. The skill of our talented team is to assist our partner clients to fully optimize their market strategy - from conception to delivery.

Probiom® LLC was co-founded in 2013 by Dennis Draeger and Akshaya Panda. Our goal, to manufacturer an effective and innovative probiotic product. Our company's healing mission - to provide a worldwide product that helps support a long and healthy life.

Probiom® is manufactured by its parent company - Dietary Pros, Inc. in Wausau, Wisconsin, USA. Dietary Pros, Inc. is a cGMP compliant facility featuring an automated manufacturing process and dedicated team of employees. In association with our parent company, we have the ability to design unique and custom formulas, and the experience to manufacture a wide selection of probiotic supplements at the highest standards.
