

## *New Technology Lab*

*In order to provide technology education for our students, Trinity Lutheran School installed a Technology Lab with the latest computer hardware in April of 2008. The Tech Lab has 17 computers allowing each student to work at their own computer station. A computer, identical to the ones in the lab, was also placed in each classroom. All the computers are loaded with Microsoft Office products and are networked with internet connections. The Tech Lab is also equipped with a projector for teacher demonstrations and viewing of videos.*

*The equipping of the Technology Lab was made possible through many generous donations, grants, and profits from fundraisers. Thank you to all who have supported this project.*

*A Technology  
Education  
Emphasis*

# Technology Education

## Technology: A Gift

We believe that technology is a gift from God and when used appropriately, it can greatly enhance the education that our students receive.

*“Every good and perfect gift is from above...” James 1:17*

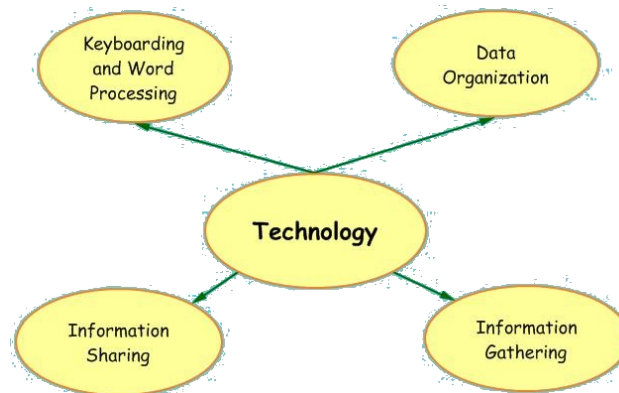

Students learn life skill of keyboarding using *Type2Learn*.

## Vision

The vision of Trinity Lutheran School is to assist parents in nurturing the child spiritually and academically, while equipping each child to be a responsible, effective citizen for life.

## Value

Students of Trinity Lutheran School will receive a high quality, well rounded education which includes technology.

Concept Map created with *Kidspiration*.

## Integration

At Trinity, technology is integrated into many subjects. Other than keyboarding and basic computer introduction, technology is not a stand alone class. Technology is used to improve instruction in core curriculum areas. Today technology is a tool of educational instruction much like books have been for many years.

Students use *Accelerated Reader* to check reading comprehension.
