

## NATIONWIDE SITE SURVEYS

Based in Phoenix Arizona, Critical Dimensions was born out of the need for a quality, reliable, and affordable site survey.

With over fifteen years of experience performing surveys all over the country including Alaska, Hawaii, and Puerto Rico. We have developed the most comprehensive approach to a successful survey.

The most important factor in our work is quality. The peace of mind we can provide to our client is invaluable. The designer or Architect must be able to design the space without worrying about whether or not the Landlord's lease outline drawing is correct or not, or whether that set of as-builts provided by the Landlord reflects the true column location.

Our range of work varies from new construction vanilla boxes, remodels of existing stores, and redemised spaces, to historical retrofits, streetside locations, and outlet centers.

Critical Dimensions can provide you with the highest quality site survey, for a reasonable price, when you need it.

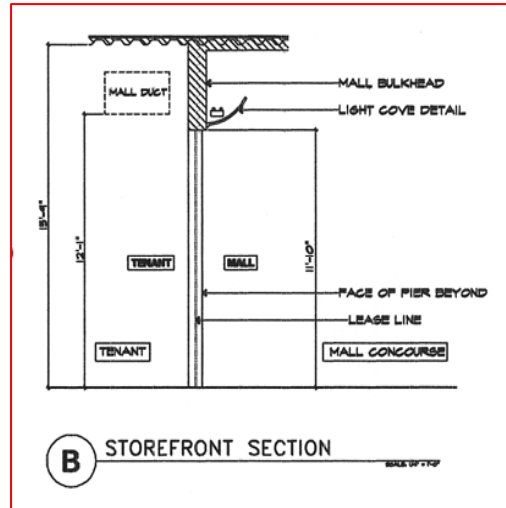

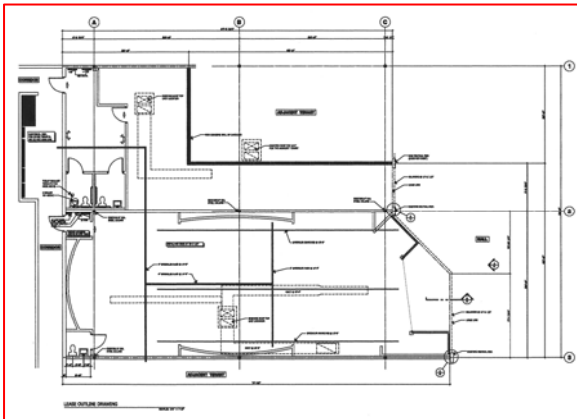

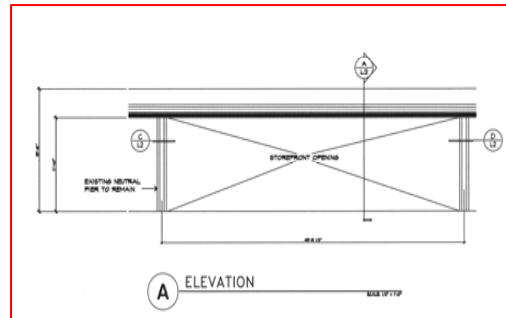

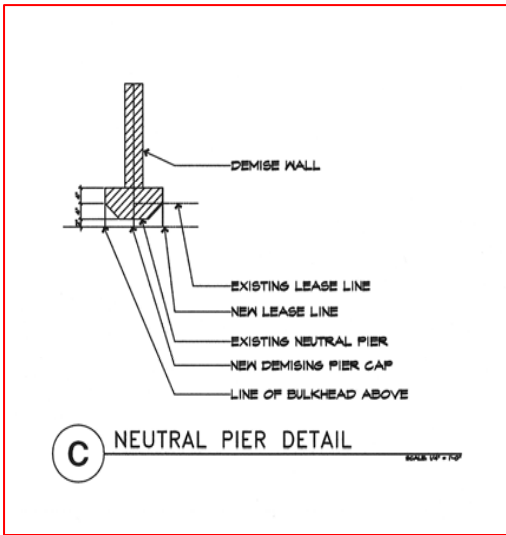

Our surveys include drawings, photos, and a survey book reflecting all aspects of the space.

### Specifics:

- Square footage verification
- Lease outline drawing
- Elevations
- Sections
- Neutral Pier Details
