ClassicMat™
Vertical Lift Module
for compact
storage and efficient
orderhandling

EFFIMAT

Storage Technology

CLASSICMAT™

A SPACE SAVING AND OPERATOR FRIENDLY VERTICAL LIFT MODULE

Are you looking for a vertical lift module that will make optimal use of floor space, while optimizing picking speed, ergonomics, safety and efficiency for your business?

ClassicMat™ gives you a vertical lift module (VLM) that is optimal for your material flow and gives compact storage of many items. ClassicMat™ has a lightweight design, lift construction and optimized PLC control, making it one of the fastest vertical lift modules on the market.

EFFICIENCY, HIGH SPEED AND GOOD ERGONOMICS

This Danish-designed and manufactured VLM can be delivered with a unique tilt feature, that allows even

more ergonomic picking and reduces reach depth. In combination with the high operating speed, this means increased efficiency and an extraordinary picking rate.

ClassicMat™ frees up to 85% of your floor space when compared with conventional storage solutions and offers the market's most user-friendly and safe pick-opening, with a shifted lighting curtain. This VLM offers a huge benefit for both your business and your employees.

The shifted light curtain means safe order picking

Optional tilt function reduces reach depth and provides an ergonomic working position

CLASSICMAT™ FAST RUNNING TRADITIONAL VLM

Space-saving, efficient and fast VLM that will
reduce your running costs

OPTIMIZED FOR COMPACT STORAGE

The VLM trays are up to 4.000 mm (157.48") in width and between 650 mm (25.59") and 1.200 mm (47.24 ") in depth. This makes ClassicMat™ the ideal choice, when you need to store products in an efficient storage system that will also save you space.

CLASSICMAT™ USES THE RACK AND PINION PRINCIPLE

The rack and pinion principle that is applied in ClassicMat™ delivers increased operating security, reduced maintenance and a highly precise vertical positioning.

TOUCH SCREEN WITH INTUITIVE OPERATION

The VLM is equipped with a large touch screen, located in a good working height in the middle of the front. The touch screen is intuitive and easy to use.

OPTIONAL TILT FUNCTION OFFERS IMPROVED ERGONOMICS

Thanks to the unique tilt function, employees have an optimal working position and a good ergonomic reach depth.

WHY CHOOSE CLASSICMAT™?

- Reduces footprint by up to 85%
- High quality and reliability thanks to the pinion principle
- Optimized for compact storage
- Fast running traditional VLM
- Automatic speed optimisation relative to load
- Simple configuration no planning of product locations needed
- Easy integration into existing storage
- Designed and manufactured in Denmark, with attractive Scandinavian industrial design
- Picking friendly, safe work front with a shifted light curtain
- Fast return on invest (ROI)

TECHNICAL DATA

WIDTH OF TRAYS

From 2.500
to 4.000 mm*
(98.43" to
157.48")*

DEPTH OF TRAYS

From 650 to
1.200 mm*
(25.59" to 47.24")*

HEIGHT

Up to 20 m
(787.40")

CAPACITY

400 or 500 kg
per tray* (881.85
or 1 102.31 lbs)*

EFFISOFT™

EffiSoft™ is a finely tuned option for ClassicMat™. The software has a simple integration to all ERP systems and supports both simple and advanced logistics solutions. EffiSoft™ can manage both order picking systems and manual picking locations. EffiSoft™ allows you to achieve effective product flow management, increased efficiency and picking speed, due to order structure analysis (leading to lower error rates), as well as automated stock checking and inventory counting.

EFFICARE™

EffiCare™ gives you on-site service and maintenance by some of the industry's most competent and experienced service technicians. This means that we are able to help you quickly and efficiently. You of course have access to remote access, at both software and at PLC level inside the system, which allows you to deploy proactive monitoring to solve problems before they result in downtime.

QUALITY IS EVERYTHING

EffiMat Storage Technology A/S was founded with the vision of creating the best order picking systems and vertical lift modules, in terms of speed, quality and flexibility.

We have successfully installed numerous solutions for international companies worldwide. We focus continually on product development, so our company is well-equipped to satisfy future requirements for high performance.
