Modular/Flexible/Durable
Casework Solutions for the Health Care Environment

For The Pediatric Heart Center representative met with Verges and technicians who use the caseworks to store all of the and procedures on tiny hearts.

Each room in your facility allows you a special opportunity. An opportunity defined by you, the people who use the room and the work they do. Realizing the most from your opportunity requires a combination of careful listening, insightful design and precise construction - using durable, attractive materials, hardware and finishes. For nearly half a century, Hamilton Sorter has done just that.

featured here, Hamilton Sorter's local Rome architects along with the surgeons room. Together they designed custom equipment required for complex surgeries

Every Hamilton Sorter solution brings these elements together quickly and cost-efficiently. Every Hamilton Sorter solution is warranted for a lifetime. The materials and methods Hamilton Sorter employs meet or exceed Scientific Equipment and Furniture Association (SEFA) standards, those of California's Office of Statewide Health Planning and Development (OSHPD), as well as GREENGUARD – Children and Schools.

Best of all, Hamilton Sorter and your local Hamilton Sorter representative will manage your project to its successful completion.

Quality, concealed 110 degree hinge with and without soft close are invisible from the outside of the cabinet for a smooth, uninterrupted door aesthetic. Other options offered are the three and five knuckle institutional hinge.

Countertops available in laminate, solid surface, stainless steel, phenolic resin and many other materials.

Easily accessible leveling system assures perfect alignment of modular components. Laminate, powder coated steel and stainless steel kick plate options are available.

Under mount slides provide a lifetime of smooth operation. Other drawer slide selections include durable under mount with soft close and full extension ball bearing.

Multiple door options like laminate with 2mm impact resistant edge band, seamless thermofoil, powder coated or stainless steel and glass fronts are standard.

Our easy-to-install, rail-mounted wall cabinets provide precise height and depth adjustment for clean installation and the look of custom millwork.

We seal all edges with impact-resistant PVC for durability; there are no exposed edges on our casegoods.

Choose from our selection of standard handles, or we can match your custom specifications.

Modular/Flexible/Durable... easy to specify

With so many unique, functional and attractive options available your solution is at hand.

Using the *Finishing Specification Guide* you can easily select a standard cabinet design and dimensions, or our Project Management Team will work with you to create the exact solution that meets your requirements. modular**Caseworks** arrive ready-to-install, so on-site installation time and disruption are minimal.

Sterile Surgical Operating Room

Easily mounted overhead cabinets above a solid surface counter provide additional storage and allow for easy access to critical technology. Durable stainless steel base cabinets with easily removable stainless steel drawers facilitate effective infection control. The glass doors allow visual assurance that vital supplies are at the ready.

Multiple door options, such as laminate with 2mm impact resistant edge band, seamless thermofoil, powder coated or stainless steel and glass fronts are available.

Exam Rooms

Sturdy laminate bases with 2 mm impact resistant edge banding and optional steel kick plates resist wear and tear, and minimize moisture wicking into the cabinetry, helping to eliminate mold. Drawers close quietly and completely thanks to the *quiet/soft close* feature. Solid surface tops and angled or closed soffit tops are easily cleaned to help break the chain of infection.

Opportunity

Create a welcoming, aesthetically pleasing, readily accessible reception desk with semi-private spaces that enable nurses to confidentially communicate with patients.

Solution

Working with The Barrett Cancer Center, University Hospital, Cincinnati, Ohio, Hamilton Sorter designed and built an impressive, ergonomic reception station with a solid surface transaction counter and ADA area. The workstation, which allows the staff to be readily visible to patients as they arrive, uses sculpted glass privacy partitions between meeting stations. Quick retrieval of files and easily accessed, removable panels for cable management allow the staff to be optimally organized. The reception desk can be completely and easily reconfigured as needed.

Reception Area

Hamilton Sorter's leveling system assures perfect alignment of the floor components with easy accessibility from inside the cabinet. Rail-mounts provide precise height and depth adjustment of wall cabinets. Unlike millwork, modular **Caseworks** allows the client to install in phases; and later to re-imagine and re-configure the layout as needs change, reducing the impact of modification and expansion on the budget and the environment.

Laboratory

Durable phenolic resin work surfaces and an integrated sink stand up to harsh and corrosive chemicals. Lockable drawers and doors with individually keyed locks provide secure storage of expensive equipment, such as microscopes. The laboratory has conveniently located data ports and electrical and gas outlets.

Customize with modular Caseworks

A place for everything and everything in its place is key to ensuring the accuracy and efficiency so vital in a properly managed pharmacy. Hamilton Sorter's five-position, easily adjustable, locking shelves with a removable lip on the front allow for gravity feed. A work island on wheels and bottle bays with easy access to empty pill bottles facilitate ergonomic movement. Additionally, a compound station with sink provides proximity to all supplies.

Pharmacy

Maximizing space is more critical than ever before. Products that combine functions save valuable real estate. The attractive conference table gives ample space for a meeting and doubles as a work surface while the credenza provides more storage space. The rounded, softened corner enables easy movement and adds additional style to the room. The pharmacy also features abundant, easily accessible file drawers and individually keyed personal lockers.

Hamilton Sorter products at work: The Pediatric Heart Center at Tulane Hospital for Children debuted the first and only combined Hybrid Cath Lab / Operating Room Suite in Louisiana. One of only ten such hybrid cath labs in the country, Tulane's lab is a fully equipped pediatric catheterization lab as well as a full operating room. Here cardiologists and surgeons work side-by-side to open the chest, place delivery catheters in the heart, and deploy devices.
