

Borroughs book depository storage systems provide versatile, secure storage for books of all sizes, from volumes to individual literary works. Borroughs' book depository design, used by Harvard University, is an excellent choice when priceless archives need to be protected. Borroughs book depository shelving will allow for high capacity and high efficiency archival storage.

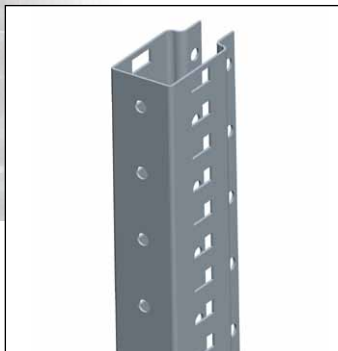

*Borroughs book depository storage systems feature:*

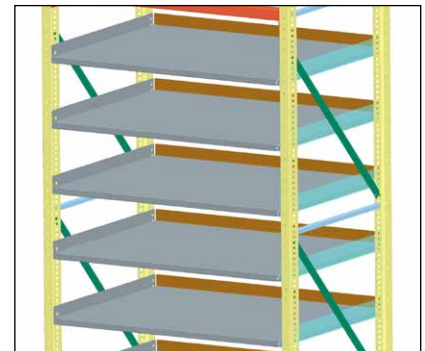

- Post Profile
- Shelf and Shelf Mount
- Carton Backstops
- Powder Coating
- Reclaimed Powder Coat

**Shelf support** has a Lance & Bayonet design, allowing a fast shelf opening adjustment and initial installation time reductions.

**Borroughs' exclusive post** design is 30% narrower than other manufacturers' posts, reducing the run length without sacrificing structural integrity. This allows for a smaller footprint in the overall system, or more useable storage space.

**Borroughs' carton backstop** is quick to install and mechanically connected to the shelf.

**Book Depository Frame** is fully welded and consists of post, horizontal and diagonal supports. All components are 14 gauge, the lower frame includes welded footplates. Frames are vertically connected using a tried and proven splicing system. Horizontal units are connected with face plates for added structural integrity.

**Face Plate and Down-Aisle Support Tube** with engineered connection to post.

**Guardrail for Mechanical Guidance System** and shelving protection.

**Low Profile Shelves** No overlapping, shelves slide straight in.

*Borroughs Technical Support team is the most experienced in the industry, and expertly guides each project from design to install.*

## COMPONENTS /SPECIFICATIONS:

### Posts

12 or 14 gauge steel (as required)  
2" wide  
32' 8" high

### Shelves

18 Gauge reinforced steel  
768 pound capacity per shelf

### Side Shelf Stops (Shelf Mounts)

14 gauge

### Rear Shelf Carton Stops

14 gauge

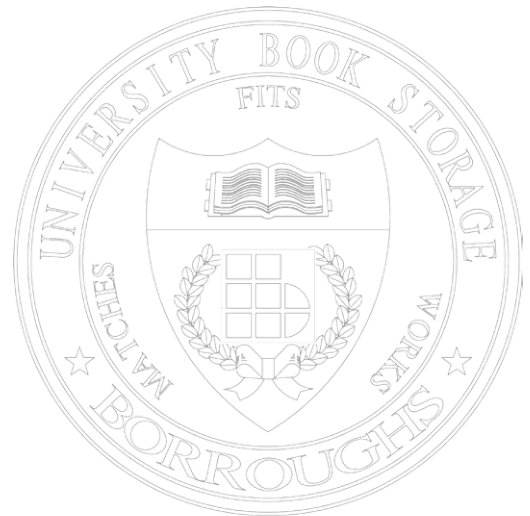

### Row End Protection

### Wall Guards

### In-Rack Sprinkler Guards

(Protect sprinkler heads)

18 gauge

ISO 9001:2008 Certified  
ISO 14001:2004 Certified
