## Our History

Our company was founded by Bob Kulp in 1985, as Kulp's Coatings. By 1992, we were successfully serving our customers with more than just roof coatings, and our name was changed to Kulp's of Stratford. This better reflected the growing range of services offered, and would serve as a premise for building a strong local brand.

Kulp's of Stratford has been at the forefront of many industry changes over the past two decades. Seeing the need for better building envelope services in our region, Kulp's now offers spray foam insulation, sheet metal fabrication and installation, window and siding installation, and roof repair service, along with a full line of steep-slope and low-slope roofing services. Solar photovoltaic roofing and related services are the newest addition to our growing business.

## Our Projects

From large commercial projects to rural retreats, to every man's castle in his tidy middle-class neighborhood, Kulp's of Stratford strives to meet your needs and exceed your expectations with our extensive array of beautiful and energy-conscious building envelope solutions.

Thousands of our clients have found answers to challenging questions about product quality and durability, energy cost reductions, workmanship issues, condensation problems, ice damming, and much more.

## Our People

We, the team members of Kulp's of Stratford, LLC, wish to assure you, our client, that we will conduct ourselves professionally and courteously while we perform our contract on your premises. You can always expect the following from us:

**Clear Communication:** We will endeavor to communicate clearly with you during the process, with regard to our plans and your expectations, to ensure full understanding and to keep misunderstandings from arising.

**Respect for Property:** We will at all times be respectful of your property, and treat it with care, better than if it were our own. If we need access to the interior of your home, we will ask about protecting the floor or removing our shoes, and will not use your restroom or furniture unless invited to do so.

**Tidiness and Clean-up:** We will put our tools and materials in order at the end of each day, and clean up thoroughly at the end of the project, leaving your place looking as nice or better than when we came.

**Exemplary Conduct:** Our personal conduct while on your property will always be exemplary, and our speech will be free from objectionable language. We will not smoke on your premises without your permission.

**Professional Appearance:** We will be dressed in a manner becoming to a professional contracting company, at all times wearing shirts, which will be clean and without offensive or distracting graphics.

**Drug-free Commitment:** We are screened for illicit drug use upon being hired, and randomly tested on a quarterly basis, providing assurance that we are committed to drug-free jobsites, including your property.

We look forward to working with you and making your contracting experience a pleasant one, exceeding your expectations while causing as little disruption as is humanly possible.

***Bottom Line: You will experience true caring from Kulp's staff!***

## Our Philosophy

### Mission Statement

We are building a great company by nurturing a wholesome and rewarding work environment for accountable and productive team players, ensuring that our clients get great results and the best customer care. We seek God's help to positively impact our community through this mission.

### Shared Values

**Integrity** – the foundation of lasting trust

**Respect** – the climate required for trust

**Accountability** – the culture trust calls for

**Openness** – the evidence that trust exists

**Teamwork** – the way people who trust work

**Caring** – the ultimate purpose and result of trust
