

## FTR-Value

### Product Data

FTR-Value polyisocyanurate roof insulation consists of polyiso foam core with superior fire performance characteristics and the ability to retain its high R-values over time.

#### DESCRIPTION

FTR-Value polyisocyanurate roof insulation is manufactured to meet and/or exceed Federal Specifications: ASTM C1289-06 Type II, Class I, Grade 2.

FTR-VALUE is offered in a variety of thicknesses for single, multi-layer and tapered installations. The closed-cell polyiso foam core is integrally laminated to fiber reinforced or fiberglass facers. The composition of FTR-VALUE provides an excellent substrate for mechanically attached and adhered FiberTite Roofing Systems.

FTR-VALUE is available in 4' x 4' or 4' x 8' boards and has a long-term thermal resistance (LTTR) of approximately 6.0 per inch.

Underwriters Laboratories and FM-Global have classified/approved FTR-VALUE, as a component of our FiberTite Roofing Systems(s), respectively as Class A (UL 790) and Class 1A (FM 4470). FTR-VALUE is also accepted by building code jurisdictions.

#### APPLICATION

See Seaman Corporation Guide Specification (GS 04/08) and Addendums as well as Seaman Corporation/FiberTite Material Safety Data Sheets (MSDS) for additional and specific application, design parameters and material precautions.

Use proper handling and storage methods for FTR-Value insulation, keeping it dry at all times. Tightly butt all roof insulation board edges and stagger adjacent joints. Install no more insulation than can be effectively covered/completed during the same day.

Except for loose laid/ballast applications, FTR-Value roof insulation must be secured to the roof deck. Approved securement methods include mechanical attachment using FTR fasteners and insulation stress plates appropriate for the deck type. Alternatively, FTR-Value roof insulation may be attached with FTR-601 adhesive, hot asphalt or other approved adhesives appropriate to the deck type. For adhered insulation attachment, insulation boards shall not exceed 4ft x 4ft.

#### PHYSICAL PROPERTIES

Dimensional Stability	ASTM D 2126	<2%
Compressive Strength	ASTM D 1621	20psi*
Water Absorption	ASTM C 209	<1% by volume
Moisture Vapor Transmission	ASTM E 96	<1 Perm
Product Density	ASTM D 1622	Nominal 2.0 pcf
Flame Spread	ASTM E 84	50 or less
Smoke Density	ASTM E 84	450 or less

\*FTR-VALUE is also available in 25 psi compressive strength (Grade 3)

#### FTR-VALUE THERMAL VALUES

Thickness	LTTR R-Value*	Flute Spanability
1.00" (25 mm)	6.00	2 5/8"
1.50" (38 mm)	9.00	4 3/8"
1.60" (41 mm)	9.60	4 3/8"
1.70" (43 mm)	10.30	4 3/8"
1.80" (46 mm)	10.90	4 3/8"
2.00" (51 mm)	12.10	4 3/8"
2.50" (64 mm)	15.30	4 3/8"
2.70" (69 mm)	16.60	4 3/8"
3.00" (76 mm)	18.50	4 3/8"
3.10" (79 mm)	19.10	4 3/8"
3.30" (84 mm)	20.40	4 3/8"
3.50" (89 mm)	21.70	4 3/8"
3.60" (91 mm)	22.40	4 3/8"
3.70" (94 mm)	23.00	4 3/8"
4.00" (102 mm)	25.00	4 3/8"

\*Long Term Thermal Resistance Foam Core Values are based on ASTM C1289-06 and CAN/ULC S770 which provides for a 15-year time weighted average. All PIMA members have adopted this advanced standard for R-Value measurement as of 1/1/03.
