

This roof **easily survived** a hailstorm leaving behind four-to-five inch hailstones.

An innovative stone coating on all DECRA roofing provides an added layer of protection that makes a big difference.

*See inside for details

DECRA PROJECT PROFILES
PROTECT AND ADD VALUE TO YOUR HOME

Great looks, 50 year warranty, 50 year track record!

Dr. Roy and Angela Brandell

Examples of roof damage

Dr. Roy & Angela Brandell reroofed their nearly 100 year old home with DECRA Tile in the fall of 2005. Two years later, a sudden hailstorm went through the Wisconsin Rapids area, leaving behind four-to-five-inch hailstones over a three-mile radius.

The storm lasted approximately 1/2 hour and caused a significant amount of damage that took months to

repair, with hundreds of roofs requiring complete replacement. Cement asbestos tiles were absolutely destroyed by this storm, and other roofing types such as clay tile, wood shakes and asphalt shingles were severely damaged and possibly unfixable as well.

However, the Brandell's roof easily survived the hailstorm. "Looking around town after this storm really validates our decision to go with DECRA," Mrs. Brandell said. The innovative stone coating on all DECRA roofing provides an added layer of protection that makes a big difference when a violent storm arises.

Some insurance companies, such as State Farm, offer discounts on insurance premiums for homeowners that use Class 4 Impact Resistant roofing materials, including DECRA's full line of products.

St. Anthony's Retreat Center

St. Anthony's Retreat Center in Marathon, Wisconsin was built in 1919. By 2005, the fiber cement asbestos roof had failed. However, the removal, handling and dumping of fiber cement asbestos is hazardous to people and the environment.

Weighing in at 500 lbs. per square, the fiber cement tiles were heavy. Any additional weight added to the roof structure had to be minimal. DECRA Shingle was chosen for the project. At only 125 lbs. per square, the added weight of the product was minimal and did not compromise the roof structure. The existing asbestos roof was encapsulated and the material diverted from the local landfill. The metal shingle completely encapsulated the failing asbestos tile, and was considered an acceptable solution by the EPA.

Choose the right roof, and it may be the last one you ever need to buy!

Fifteen years ago, Kulp's of Stratford was Central Wisconsin's only DECRA installer. Now, hundreds of roofs and satisfied customers later, Kulp's is still this area's DECRA installer of choice with the most experience and best service available.

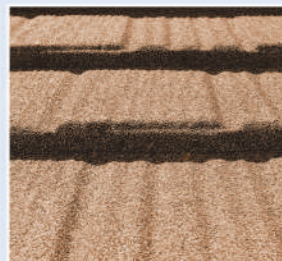

- Fire safe
- 120 mph wind warranty
- Highest impact resistance to hail
- 50 year limited warranty
- Reduced energy consumption
- Reduced landfill impact
- Low maintenance
- Won't crack, burn, split or warp
- Lightweight, 150 lbs/square
- Non-corrosive aluminum zinc alloy coated steel

With a 26-gauge aluminum-zinc alloy coated steel sheet, a space age resin to adhere the granules on the sheet--this is one of the simplest and most durable roofing products available. Its interlocking panels provide wind blow-off protection and a warranty to 120 mph for 50 years.

Add building integrated solar photovoltaic panels to your DECRA roof to help the roof pay for itself!

Ask for details.

Talk to us about our specialty metal fabrication products for cupolas, finials, louvers, and crosses.

Your only limit is your imagination!

DECRA is an excellent choice for historical projects!

DECRA is a long term solution for those projects that are very difficult to access!

Kulp's provides our own manlifts up to 125 feet, also making these projects easier.

Kulp's safe, trained, and efficient crews make your roofing project a painless process!

Consider spray foam insulation whenever you are reroofing to make your building more energy efficient!
