APRIL IS NATIONAL CAR CARE MONTH

As winter comes to an end, it is time to get your car ready for spring driving and summer road trips! It is important to make sure your tires, brakes and windshield wipers are ready for the rain, and take care of any issues that may have occurred or been ignored during winter.

The Car Care Council recommends these tips to keep your car operating at its best:

- Check your car's oil, filters, and fluids. Oil should be changed according to the owner's manual recommended intervals. Brake, transmission, power steering, coolant and windshield washer fluids should also be checked regularly. Your car's filters require regular inspection and replacement.
- Check the car's tire pressure regularly. To reduce tire wear and improve fuel economy, have your car's alignment checked annually.
- Test interior and exterior lights and replace any bulbs that no longer work. Windshield wiper blades should be replaced every six months or when cracked, cut, torn, streaking or chattering.
- Check that the battery connection is tight and corrosion-free. If the battery is more than three years old, it should be tested and replaced, if necessary.
- Check the brake system each year. If the brakes make a grinding noise or if your stopping distance has increased, get your brakes serviced.

Caller: "On page 1, section 5 of the user guide it clearly states that I need to unplug the fax machine from the wall socket and telephone Jack before cleaning. Now, can you give me the number for Jack?"
