## GUIDE TO A LONG-LASTING VEHICLE

Let's say you've got a nine-year-old vehicle with plenty of distance on the odometer. What can you do to make it last another year or two?

Let's start with the premise that there's no reason that a modern car can't run for 200,000 miles with proper care. The engineering and manufacturing quality is there. Of course, some parts will wear out along the way, but there's no reason for a catastrophic meltdown if you stay on top of your recommended maintenance even beyond the end of the printed schedule. For example, if a service is recommended every 15,000 miles when the vehicle is new, you can just keep getting it done at least every 15,000 miles after you go forth. But it gets more complicated because older engines lose some efficiency, are dirtier inside and are just more stressed. That means it's very important to not miss any scheduled services. Skipping just one oil change, for example, leaves an opportunity for harmful sludge to build up.

So all the usual things like oil changes, transmission service, coolant service, brakes, power steering, fuel system cleaning - all that stuff needs to be maintained. Business owners responsible for fleet vehicles are positively religious about scheduled maintenance. They know that money spent on maintenance saves them three ways:

- It saves fuel,
- It prevents costly repairs
- They can postpone purchasing new vehicles.

Having the oil changed may be the most important thing. A full-service oil change at **Auto Select** means that all of your other fluids get topped off so they don't get low enough to cause damage. It also gives our technicians a chance to spot problems in the early stages so that you can fix them before they get expensive. And it gives you a touch point with a professional along the way to remind you of things that aren't scheduled as often - things like differential service and timing belt replacement.

Drivers with an older vehicle may want to follow the severe service maintenance schedule. Check your owner's manual and talk with your friendly and knowledgeable **Auto Select** service advisor. Conditions inside an older engine, transmission and cooling system can arguably be considered severe, so shorter intervals could well be called for.

And the team at **Auto Select** strongly encourages you to consider using **high mileage formulation fluids**. They're fluids like engine oil, transmission fluid and coolant that are formulated for older engines. They have special additives to clean deposits and to condition and restore seals and gaskets that dry out with age. Some start using higher mileage formulations at around 50,000 miles as a preventive measure.

## HUMOR

Is there ever a day that mattresses are not on sale?

Why do people keep running over a string a dozen times with their vacuum cleaner, then reach down, pick it up, examine it, then put it down to give the vacuum cleaner one more chance?

In winter why do we try to keep the house as warm as it was in summer when we complained about the heat?

Why do people constantly return to the refrigerator with hopes that something new to eat will have materialized?

Why is it that whenever you attempt to catch something that's falling off the table you always manage to knock something else over?

### Which car is considered to be the first "Muscle Car"?

**A:** Although there had been powerful cars built up to this point, it is the 1964 Pontiac GTO, which is recognized as the first true muscle car. With an advertising and marketing campaign stating the facts, the midsize Pontiac Tempest/Lemans could be optioned with the GTO package, featuring a 389ci tri-power (3-dual carburetors) engine, dual exhaust and hood scoops.

## Venison Towers

Courtesy of Harold Schweik

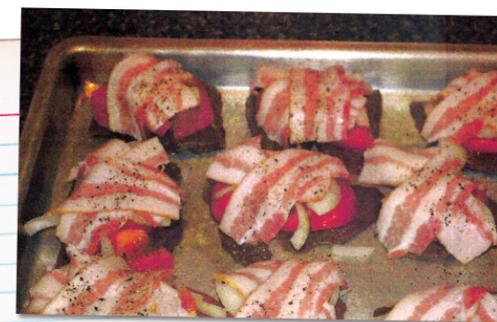

### INGREDIENTS:

- One section of a Venison Back Strap about 10" long
- Tomatoes (as required)
- Onions (as required)
- Bacon (as required)
- Pepper (to taste)

### DIRECTIONS:

1. Slice the back strap crosswise. Slices should be approximately 1/2" thick. I usually slice the back strap on a slight angle. This results in slices being a little larger.
2. Next, (I use a wood meat tenderizer) and gently tap the slices on both sides.
3. Then, place on an ungreased cooking sheet.
4. Cut slices of tomato approximately 1/2" thick. Lay slice over the back strap.
5. Next, cut a slice of onion approximately 1/4" thick. Place it on top of the tomato slice.
6. Finally, cut a strip of bacon in half and crisscross the bacon strips on top of the onion.
7. Once they are all covered, sprinkle with pepper and bake at 350 degrees for approximately 45 minutes or until you can see that the bacon is ready to eat.

I guarantee that you will enjoy the aroma too!

*Here's what our clients are saying...*

This is a caring team of great auto specialists that care and take the time to help you at the Stevens Point location. Must say, great, friendly, good hearted, hard working Americans that got me in and out when I was in a jam. Fast service and them staying open longer than most others. Also, they text you and ask you how you are doing. These people not only know what they are doing, they are not grumpy. They don't over charge and they make you feel like family. They get you rolling again. I feel this way about them especially. I recommend this business. Go on down there and see for yourself. Don't waste time, call these people and get it done right the first time. Auto Select, that's all you need to know.  
*D Angel - Stevens Point Express*

**Super friendly - reasonable quote - prompt service...** Will definitely let them work on all my vehicles. *Lynn S. - Weston*  
I was told by another place that I needed over \$4,500 to fix my vehicle. A friend of mine said get it out of there and take it to Auto Select, so that's what I did. They checked everything out and said that it was running fine and suggested that I put new spark plugs in so that they were all new and not just the one changed by previous place. After everything they did including a valve cover gasket, they saved me over \$4,000. I will recommend them to anyone that needs vehicle repair or tires. **They are definitely my new go-to place. I highly recommend them.** *Rhonda P - Shawano*

Mike is very knowledgeable about cars. He has been helping me for years. I can't explain the relief he gave me when he fixed my brake lines. He even took pictures to explain the problem. **I am a lifetime member of Auto Select now and forever.** *Mike W - Appleton East*

**Great service, fast, very fair, and accurate pricing.** Will definitely take my car there again! *Jason C - Appleton North*

**Always pleased with the experience at Auto Select.** Courteous, accommodating, professional. I have trusted my vehicles with them for years. Highly recommended. *Vivian W - Stevens Point East*

I have been taking my car to Auto Select for years. Most recently, I have had continuous reoccurring car issues resulting in me bringing in my car several times in a short period of time. The guys (especially Jaramey and Chad) at Auto Select always went above and beyond with communication about my car issues, were honest about what needed to be fixed, and did what they could to make dealing with car issues less stressful. When I did buy a new car, I trusted Auto Select to check it over to make sure there were no major issues. **I would highly recommend Auto Select for their professionalism, communication, and quality of services!** *Micayla F - Green Bay East*

**Friendly, exceptional service!!** Always gets the job done well & at a fair price. They know their customers & greet you by name. A++ service!! *Cheryl D - Green Bay West*

**Staff is awesome** and help your vehicle get going as they should. *Grace - Neenah*

**Always a great expedient experience. The guys are friendly and attentive.** Thank you!! *Cary E - Appleton Express*

**I'm always pleased with the work and customer service.** I know they will find out what's wrong, fix it, and leave me with a well running car. *Kathy T - Stevens Point South*
