

XF Series LPG Cushion Tire Forklift

with capacities of 8,000 to 12,000lbs

The World of Hangcha

CONCEPT

XF series LPG cushion tire forklift is developed on basis of existing XF series by Hangcha, with world-leading technologies, a world-class forklift that can meet your demand in all dimensions thanks to the overall upgrading in appearance modeling, energy conservation and environmental protection, comfort, safety, and reliability. Application of new technologies including load-sensing hydraulic system, energy-efficient lighting system, low-emission engine, effective noise and vibration control, and brand-new control system offers higher efficiency and lower cost for your work.

LED lighting system and environmentally-friendly materials for entire truck

LED lights are applied for entire truck. It saves power and energy, with significantly increased performance and service life of lights.

Environmentally-friendly materials are applied for the entire truck to minimize damage to environment.

Visualized LCD instrument panel

Newly developed LCD meters have more complete functions and more stable performance. Important information including running status of the entire truck and failure of the engine (electronically controlled engine) can be displayed completely, so that the operator can understand status of the truck in a visualized manner, for easy maintenance.

Wide-view mast offering better visibility

New type of steel channels and mast system of brand-new design are applied to increase visibility in front of the driver.

Low LPG fuel
warning indicator

Safety lock for engine hood

It is safe for driving by the operator, and can be opened easily.

Reliable hydraulic system

Optimized hydraulic breather structure, with built-in return oil filter, increases service life of hydraulic oil system;

Load-sensing hydraulic steering system is highly energy efficient.

Cooling system of optimized design

Aluminum plate-fin radiator of stronger cooling performance and higher structural strength is applied, with independent oil radiator, optimized heat transfer channel, and counterweight with dual-hole ventilation, which improve cooling efficiency substantially, increase reliability for heavy-load operation, and guarantee reliable work of the engine.

New generation of integrated electrical box

The new generation of integrated electrical box is applied, with reasonable layout, easy for service and maintenance, with better waterproof performance.

The entire truck is equipped with waterproof connectors, with increased waterproof performance.

Full-view rear view mirror

Full-view rear view mirror provides wider rear view, safer for operation.

**TOUGH
TRUCKS**

New steering wheel adjusting mechanism

Small-diameter steering wheel and electro-hydraulic steering (hydraulic transmission) design, and car-like combination switch of double handles, increase operator comfort substantially.

Tilt-back LP bracket (Opt.)

Tilt-back cylinder holder is easy for replacing LPG cylinder and opening engine hood for maintenance.

North America certified engine

High power and high torque, favorable clean emission, and excellent fuel economy;

Emission standard of the engine is in compliance with EPA/CARB Tier2;

Electronically controlled engine.

Large hand grip

Large hand grip of optimized design enables easier access to the truck.

High-strength suspension overhead guard

The overhead guard is fabricated with specially-shaped steel tubes, with high strength; integral overhead guard, easy for repair and disassembly; flexible connection is applied between overhead guard and truck frame, with small vibration, which increases operator comfort substantially.

Steering axle

Large-sized conical bearing is applied at master pin of the steering axle, together with a large-diameter steering cylinder, and buffer blocks at top, which increase reliability of the steering axle substantially.
